

# WIPE TEST PLAN ISOTOPE LAB

S/N for van 625.5.02

Propose:  
This plan is to be used to define the zone to be tested during a wipe test. Each zone used is to be wipe tested. This will ensure that each PI has an opportunity to detect spills & define back-round noise, allowing the clean up procedure to be used where needed.

**ANY AREA EXCEEDING 100 DMP MUST BE CLEANED and RE-TESTED**
